

Global Climate Change: How It Affects You and Your Agency

A Presidential Management Fellows (PMF) Forum

July 27, 2007

Hosted by EPA, DOE, and NOAA

At EPA Headquarters, Potomac Yard (Crystal City, VA, Metro accessible)

This forum is designed to illuminate the cross-cutting challenges of climate change to the Federal Government. Attendees will gain: an increased understanding of climate change science and global impacts; a greater awareness of how climate change affects future government leaders; a toolkit of solutions (including the “[stabilization wedges](#)”) for effective public policy development; and an opportunity to network with other PMFs interested in mitigating the harmful effects of climate change.

8:30 – 9:00	Registration
9:00 – 9:15	Welcome and Opening Remarks
9:15 – 10:15	The Challenge of Climate Change Rob Bradley, World Resources Institute
